

## Information on Storage Totes

Home Depot is now stocking the totes we use to transport the modules

106 Qt. Latching Storage Box

Model # 14998004

\$12.98

33.875"d

18.75"w

13"h

116 Qt. Ultra Latch Storage Box

Model # 19908604

\$18.98

33"d

18.75"w

13.5"h

This is the model we have been using

Both of these can easily protect a single double module, two singles, or two outside corners if supported by "folding foam" on each side of the module.

Bob Belt has successfully demonstrated that he can put two doubles into a tote using a foam framing support to hold the top module, but the modules take 7" (3 1/2" x 2) of height leaving a total of only 6 inches for combined scenery heights.

I think I might be able to get my 3 double yard modules into one tote.
